<p align="center">Al Haitham Al Shanfari
BSc Computer Science Graduate</p>

I am a BSc Computer Science (With Honour) graduate from the University of Liverpool with hands-on experience in website development and collaborative software projects. Throughout my degree, I contributed to several group-based projects, including leading a team in developing a full-stack web application. These experiences strengthened my skills in teamwork, leadership, and problem-solving while adapting to changing project requirements and tight deadlines.

Skills

- Software Engineering
- Computer Forensics
- Web Development: HTML, CSS, React, Node.js, PHP
- Managing Databases: MySQL

Programming Languages

Python, Java, Javascript, PHP, R Script.

Second Upper Class (2:1)
University of Liverpool, United Kingdom

2022   **International Baccalaureate (IB)**
The Sultans School, Sultanate of Oman
33 Points

Projects

Hobbies

Outside of my studies, I've always made time for the things I'm passionate about. I enjoy travelling, as it allows me to explore different cultures, meet new people, and gain fresh perspectives something I've found incredibly enriching. I'm also a big fan of football, both playing and watching, as it brings out my competitive spirit and love for teamwork. Additionally, I have a strong interest in combat sports, which have taught me discipline, resilience, and the importance of mental and physical fitness. These hobbies keep me active, focused, and constantly learning.
